GAB H844

grifo® Analog BLOCK Housing, 8 analog in, 4 in opto, 4 out Relays

CAN GM2

CAN grifo® Mini Module AT89c51CC02

TECHNICAL MANUAL

Couple between interface board of **Analog Block GAB H844** series and **Mini Modules** with **PIC** core with **28 pins CAN GM2**, able to manage application that involve bot **Analog** and **Digital** signals and **CAN** line communication.

IMPORTANT

Although all the information contained herein have been carefully verified, **grifo®** assumes no responsibility for errors that might appear in this document, or for damage to things or persons resulting from technical errors, omission and improper use of this manual and of the related software and hardware.

grifo® reserves the right to change the contents and form of this document, as well as the features and specification of its products at any time, without prior notice, to obtain always the best product.

For specific informations on the components mounted on the card, please refer to the Data Book of the builder or second sources.

SYMBOLS DESCRIPTION

In the manual could appear the following symbols:

Attention: Generic danger

Attention: High voltage

Attention: ESD sensitive device

Trade Marks

GENERAL INDEX

COUPLE RESOURCES 1

ISP PROGRAMMING 1

COUPLE CONNECTIONS 1

FIGURES INDEX

FIGURE 1: CONNECTION TABLE (1 OF 5)	2
FIGURE 2: CONNECTION TABLE (2 OF 5)	3
FIGURE 3: CONNECTION TABLE (3 OF 5)	4
FIGURE 4: CONNECTION TABLE (4 OF 5)	5
FIGURE 5: CONNECTION TABLE (5 OF 5)	6

COUPLE RESOURCES

The **GAB H844 + CAN GM2** couple has the following resources:

Max. value voltage of A/D converter (Vmv):	2,5 V
Conditioned analog inputs (0÷20mA, 4÷20 mA, 0÷Vmv, 0÷4*Vmv):	6
Direct analog inputs (0÷Vmv):	4
Relays output:	2
Otpocoupled digital inputs:	4
Buffered TTL digital inputs:	4
TTL multifunction signals:	4
Asynchronous serial line RS 232:	YES
Asynchronous serial line TTL:	YES
Asynchronous serial line RS 422:	YES
Asynchronous serial line RS 485:	YES
Asynchronous serial line Current Loop:	YES
Synchronous serial line I2C BUS:	YES, software
CAN interface:	YES
USB interface:	NO
Real Time Clock:	YES

It is important to note that the previous list shows the maximum available resources and some of these ones are not usable in the same time, as described in following figures.

ISP PROGRAMMING

On **GAB H844 + CAN GM2** couple You can easily select the operative mode, directly by one of field connectors, as follow:

- CN4.1 not connected -> **RUN** mode: application program is executed.
- CN4.1 connected to CN4.9 -> **DEBUG** mode: boot loader is executed, that allows to update the on board memories of the Mini Modules, through a normal PC connected with RS 232 serial line, that execute the **FLIP**.

To connect 1 and 9 pins of CN4, during the power on of the boards, the user can use a switch, a jumper, a button, etc.

COUPLE CONNECTIONS

In the following tables are reported all connections of all available signals for user of **GAB H844** respect to **CAN GM2** Mini Module. With these connections the user can manage all available resources both in hardware and in software.

If it needed a documentation more detailed, (connection diagram, signal location on connectors, power supply, jumpers configuration, software management, etc.) please, see technical manuals of the two modules contained in the couple.

In the tables are present some abbreviation and reference:

N.C. = Not Connected

N.M. = Not Mounted

*1 = to configure according to the performed connection.
