GMB HR246

grifo® Mini BLOCK Housing, 24 Opto Input, 16 Relay Outputs

GMM ACB Zero

grifo® Mini Module Atmel AT 89C51CC03

TECHNICAL MANUAL

Couple between interface board of **Digital Block GMB HR246** series and **Mini Modules** with **8051 Core** with **40 pins GMM ACB Zero**, able to manage application that involves both **Digital, CAN** and **Analog Signals** and line **Communication**.

IMPORTANT

Although all the information contained herein have been carefully verified, **grifo**[®] assumes no responsibility for errors that might appear in this document, or for damage to things or persons resulting from technical errors, omission and improper use of this manual and of the related software and hardware.

grifo[®] reserves the right to change the contents and form of this document, as well as the features and specification of its products at any time, without prior notice, to obtain always the best product.

For specific informations on the components mounted on the card, please refer to the Data Book of the builder or second sources.

SYMBOLS DESCRIPTION

In the manual could appear the following symbols:

Attention: Generic danger

Attention: High voltage

Attention: ESD sensitive device

COUPLE RESOURCES

The **GMB HR246 + GMM ACB Zero** couple has the following resources:

Relay Outputs:	24
Optocoupled Inputs:	16
Optocoupled Inputs Type:	NPN , PNP, Powered
Multifunction Signals I/O TTL, A/D, PWM, CAN, etc.:	6
Analog Input (0÷Vfs, 0÷4*Vfs):	1
Max. Value Voltage of A/D Converter (Vfs):	2,5 V o 10,0 V
Serial Line in RS 232:	1
Serial Line in TTL:	1
Serial Line in RS 422:	1
Serial Line in RS 485:	1
Serial Line in Current Loop:	1
Serial Line in I2C BUS:	YES, Firmware
CAN Interface:	Yes
USB Interface:	NO
Real Time Clock:	NO

It is important to note that the previous list shows the maximum available resources and some of these ones are not usable in the same time, as described in following figures.

COUPLE CONNECTIONS

In the following tables are reported connections of all user available signals on **GMB HR246** related to **GMM ACB Zero Mini Module**. With these connections the user can manage all available resources either by hardware and by software.

When a more detailed documentation is required (connection diagrams, signals location on connectors, power supply, jumpers configuration ,software management, etc.) please, see technical manuals of the two modules contained in the couple.

In the tables are present the following abbreviations and references:

N.C. = Not Connected

N.M. = Not Mounted

*1 = to configure according to the performed connection.
